How Credx Blockchain Works?

A fork of the bitcoin code, To help promote Green Revolution there are some major changes done in **CredX** Blockchain. It features the issuance schedule (block reward of 0.00000001 CDX) and Block time (1 minute) and MasterNodes. It is fully explained in Whitepaper Docs.

Blockchain

It is transparent. It is just another bitcoin forked blockchain with intelligent code changes. More faster and light weight. With almost zero carbon footprint. The **CredX blockchain** is capable of handling higher transaction volume than its counterpart - Bitcoin. Due to more frequent block generation, the network supports more transactions without a need to modify the software in the future. As a result, merchants get faster confirmation times, while still having ability to wait for more confirmations when selling bigger ticket items.

Wallet Encryption

Wallet encryption allows you to secure your wallet, so that you can view transactions and your account balance, This provides protection from wallet-stealing viruses and trojans as well as a sanity check before sending payments.

Mining Reward

Introducing BlockStacking. Its simple like ethereum and works on the basis of validator staking system. Stake to become a validator. Staking is a public good for the CDX ecosystem. You can help secure the network and earn rewards in the process. Block staking reward and coin generation is explained .
